SPECIAL PROGRAMMES

Applied Learning Program (ALP) - Design for Smart and Sustainable Urban Living

Calling all budding Eco Champs... We want YOU! In Jurong Secondary School, we believe the future is you!

Lead the charge into the future as JSS equips you with the skills you need to be a part of the fast-growing sustainability sector. Using a STEM-focused approach, Lower Secondary students investigate urban livability and come up with prototype solutions while engaging with and creating urban planning simulations. The programme leverages STEM to explore solutions using tinkering and coding. You will emerge from the programme ready to meet the challenges of the future.

Take your passions further as an Upper Secondary student and receive mentoring for research projects and national competitions. You may pursue your own specialised project on environmental issues. Teacher mentors will support your efforts to grow your knowledge, as you develop your ideas and turn them into a reality. Become a Champion of sustainability in urban Singapore and help to secure the future of generations to come!

Ready, Set... Go! Be Sporty at Heart, Sporting in Mind with our Learning for Life Programme (LLP)

Traverse the seas, speed down the streets, scale the heights and sling arrows at your target during the LLP Level Enrichment Programmes. Challenge yourself and show off your physical prowess as you make lifetime memories with your classmates and friends in your own pursuit of an active lifestyle. With character-building activities like Kayaking, In-Line Skating, Sports Climbing and Archery, there's always something exciting awaiting you in JSS.

If you're left wanting for more, sign up for the LLP Sports Award and get funding to seek out your own sporting adventure.

inSPire – Make your dreams a reality!

Have you ever wanted to control your very own robot army? Become a violin virtuoso? Or slide onto the scene as the next hip hop superstar?

Our inSPire Programme can help you make that dream a reality! Driven by the belief that when there is a will, there is a way, our school provides resources under the inSPire Award to help our eager students pursue their passions and develop skills and competencies that will prepare them for success in their future careers. Under the programme, you will be able to explore a multitude of skills and disciplines under the domains of Arts and Culture, Science and Technology, and Media and Infocomm.

With completed projects ranging from coding, drone programming and entomology, to hip hop, K-pop-dancing and violin, there's almost no dream we can't help make a reality and no limit to where your inSPiration can take you!

Take your learning to the next level during Jurong Secondary School's Learning Fest as you learn from your peers through a series of student-led workshops. Share your own journey of learning while tapping on the insights of your peers in this celebration of learning!

Whether it is to ignite and explore a new interest, to feed the fire of a current sport you love to play or to fan the flames of passion in friendly competitions, Jurong Secondary School will be there to support your journey. With projects ranging from Ice Skating to Horseback Riding, the world of sports is open to you here at JSS.

Let us help you build your success story in the arena of sports, pursue a healthy lifestyle and become a Champion of Mind.

Project COMpassion – With the Community, For the Community

In Jurong Secondary School, we believe that you can lead the way to find solutions to the issues you see in your community. Through Project COMpassion, students are able to gain funding and mentorship to help solve some of the issues faced by the less fortunate in the neighbourhood. Embark on a journey of awareness, advocacy and activism as you work, hand-in-hand, with community partners and non-profit organisations to make a difference in your community.

With projects that have aided animals, the elderly and people with special needs under the programme's repertoire, Jurong Secondary School is well-equipped to help you become a Leader with Heart. Become a Champion of action and strive to advocate for those who are unable to do so for themselves!

STAR (Skills, Talent and Research) Development Programme – Become a STAR that you are!

For those striving for excellence, the Skills, Talent and Research Development Programme is for you!

Offered only to the cream of the crop, the STAR Development Programme provides a platform for students to embark on projects and engage in the discussion of national and global issues using an interdisciplinary approach. Delve deep into the problems that plague our world and seek unique and realistic solutions with a critical eye and mind, before diving headfirst into your own passion project with like-minded students.

In Secondary Three, look forward to the overseas Immersion Trip where you will be able to gain insights about the world through interactions with students and Singaporean entrepreneurs to learn about the challenges faced in competitive and globalised cities much like our own. Learn about the dispositions and attitudes important for success in a fast-changing future economy, and learn to appreciate diversity in a globalised world.
